

Claude Mythos

Data SAIL – Tech News

What is it?

- **New model tier.** Superior to Haiku, Sonnet and Opus.
- **General Purpose, with a twist.** It has unexpected powerful cybersecurity capabilities.
- **The name.** "Mythos" is ancient greek for the connective tissue that links knowledge.

Timeline

Late March 2026

- Fortune Magazine leaks info from Anthropic's misconfigured CMS

April 8 2026

- Anthropic officially announces Mythos Preview

April 8 2026

- Project Glasswing launched along model reveal

April 8 2026

- Access given to more than 50 companies

Cybersecurity Capabilities

27-year-old open BSD bug

Found a remote crash vulnerability in one of the world's most security-hardened OSes.

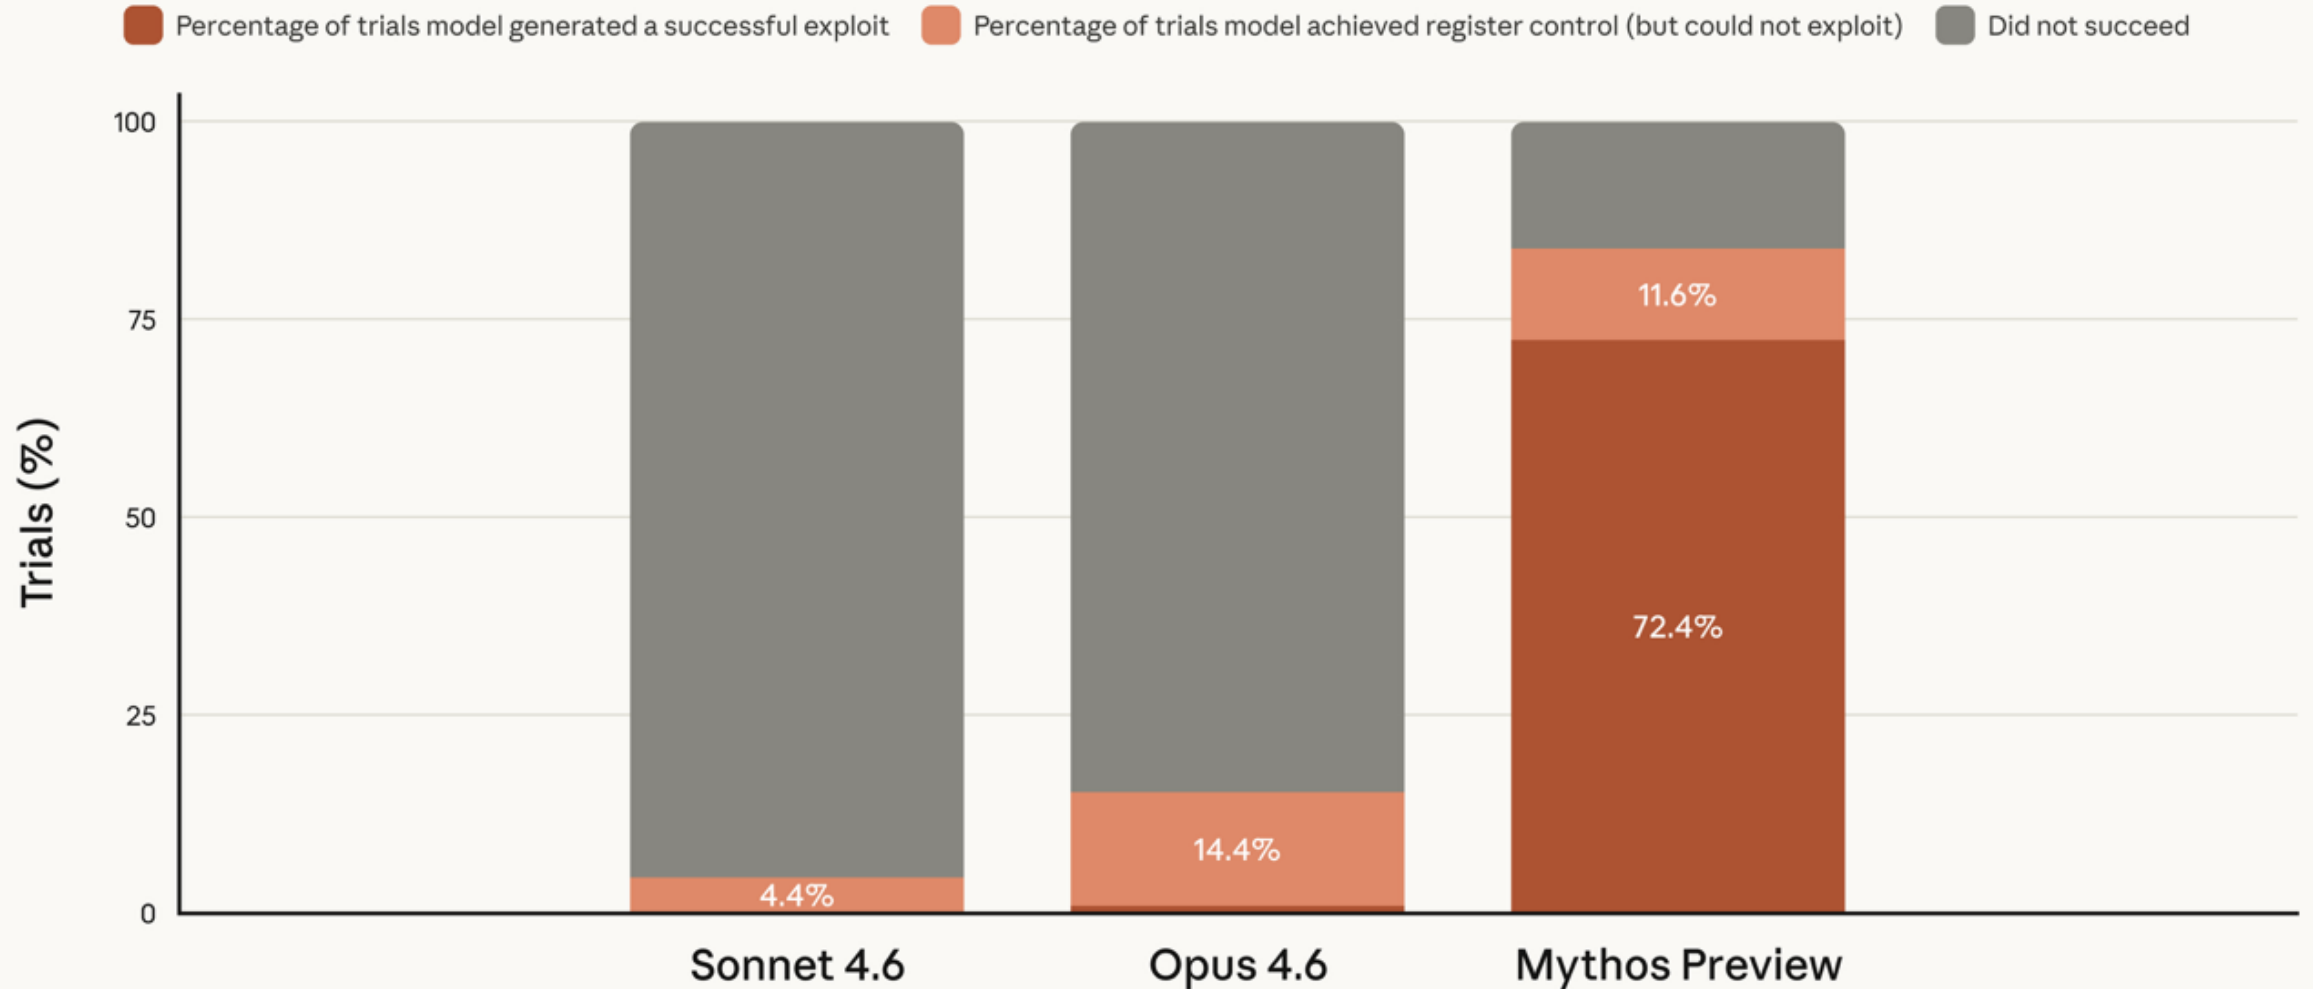

16-year-old Ffmpeg flaw

Discovered in a line of code that automated tools had hit over five million times without detecting.

Linux Kernel privilege escalation

It was able to chain multiple vulnerabilities autonomously to go from regular user to full machine control.

Firefox JS shell exploitation

In a previous blog, we noted that Opus 4.6 was able to successfully generate exploits for crashes it found in Firefox in two separate trials out of many, which was a success rate of less than 1%. We plot this success rate next to Claude Mythos Preview, which succeeds at creating a working exploit nearly 100 times more often.

Project Glasswing

What is it?

Coalition of 12 founding partners and 40+ additional organizations using Mythos Preview to scan and secure critical SW infrastructure.

The resources

- \$100M in Mythos usage credits
- \$4M in direct donations to open-source security organizations

Founding Partners

-
- AWS
 - Apple
 - Cisco
 - Broadcom
 - CrowdStrike
 - Google
 - JPMorganChase
 - Linux Foundation
 - Microsoft
 - NVIDIA
 - Palo Alto Networks
 - Anthropic

Discussion Questions

Should AI labs be allowed to restrict access to powerful models indefinitely?

If you were Anthropic, would you release Mythos publicly?
